DETAILED ACTION

This office action is in response to the amendment filed June 23, 2008. In accordance with the amendment, claims 1, 3-8, 10, 15, 17-20, and 22 have been amended, while claims 11-14 and 23-26 have been canceled. The amendments to the title and specification have been acknowledged.

Claims 1-10 and 15-22 are pending.

Allowable Subject Matter

1. Claims 1-10 and 15-22 are allowed. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Mizuuchi et al. U.S.P. No. 6,353,495 B1; Mizuuchi et al. U.S.P. No. 6,002,515) does not teach or reasonably suggest, *in combination*, each claim limitation as amended for a *method of forming a domain inverted region in a ferroelectric single crystal* (independent claims 1 and 15, dependent claims 2, 3, 5-10, and 16-22). In particular, there is no teaching or reasonable suggestion for the further limitation wherein the control layer functions as physical hindrance for a growth of said domain inverted region to a first electrode by the larger defect density (see amendment to independent claims 1 and 15). See Applicant's arguments and remarks filed June 23, 2008 on **pages 12-18** that fully address how the claimed limitations patentably distinguish from the two Mizuuchi et al. references.

Regarding newly amended independent claim 4, the closest prior art of record does not teach or reasonably suggest, in combination, a specific *method of forming a domain inverted region in which the further steps of depositing a metal layer and*

annealing the metal layer as the formation of the control layer (see reasons for indicating allowable subject material in the office action mailed March 25, 2008).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see amendment with remarks, filed June 23, 2008, with respect to pending claims 1-10 and 15-22 have been fully considered and are persuasive. The rejections to Mizuuchi et al. '495 and Mizuuchi et al. '515 under 35 U.S.C. 102(b) and 35 U.S.C. 103(a) have been withdrawn.

Inventorship

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Conclusion

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on (571) 272-2344. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
